ARCUD MULTI-SERVICES LIMITED

COMPANY PROFILE

Construction • Civil Works • Design & Build • Infrastructure

Professional Company Profile

1. COMPANY OVERVIEW

ARCUD Multi-Services Limited is a multi-disciplinary construction and services company with documented experience in building construction, civil works, design and build, housing and estate projects, road works, water supply and sanitation, landscaping, maintenance, fuelling-station construction and related infrastructure works.

The existing company record documents projects delivered or undertaken across Adamawa State and other locations in Nigeria, with project entries dating from 2013 through 2025. The portfolio includes work for private clients, financial institutions, educational institutions, public-sector bodies and other organisations.

ARCUD's documented technical capacity is supported by construction plant and equipment including road-building, earthmoving, compaction, lifting, concrete, water-distribution and surveying equipment.

This profile has been reorganised from the supplied company profile to present the company's documented capabilities, project experience and equipment in a clearer corporate format. Statements not supported by the supplied source have deliberately not been presented as facts.

2. OUR VISION

To develop ARCUD Multi-Services Limited as a dependable provider of construction, civil engineering and related infrastructure services, delivering practical solutions that meet project requirements and client expectations.

3. OUR MISSION

To execute construction and infrastructure projects through disciplined planning, competent technical execution, appropriate equipment and a commitment to quality, safety, timely delivery and responsible project management.

4. OUR CORE VALUES

Integrity • Professionalism • Quality • Accountability • Safety • Client Focus • Teamwork • Continuous Improvement

5. OUR SERVICES

- Building construction and related works
- Design and Build services
- Civil works, road construction and road maintenance
- Housing and estate development
- Water supply and sanitation works
- Landscaping and access-road works
- Oil & gas fuelling-station construction
- Building maintenance, rehabilitation and painting
- Selected electrical/infrastructure works
- Construction plant, equipment and site support

The service areas above are based on the nature of projects and equipment documented in the supplied company profile. Specific services can be expanded or narrowed in future editions as ARCUD's registered business activities and current operating scope are confirmed.

6. PROJECT EXPERIENCE

ARCUD's supplied project record contains a broad range of construction and infrastructure assignments. Selected examples include retail and fuelling stations, shopping complexes and malls, housing estates, a 104-bed ward building, university facilities, road maintenance, water and sanitation, landscaping, steel water storage, ATM facilities and electrical infrastructure.

The project schedule below preserves the project names, clients, locations, delivery mode, year and status contained in the source profile.

Project	Client	Location	Mode	Year	Status
Construction of NNPCL Retail Station, Yola (Sub-contract)	Bokkis Nig Ent. Ltd	Along Fufore Road, Yola	Build	2025	Completed
Shopping Complex	Blue Ribbon Smile Ltd	Along Yola Road, J/Yola	D & Build	2023	In Process
Major maintenance and repairs of Dong-Sabon Gida Road	FERMA	Donga-Sabon Gida, Taraba State	Build	2022	Completed
Revenue generation through issuance of Certificate for Abuja mass housing	FCDA	Abuja, Nigeria	Execution	2022	In Process
Futuk and Sons Fuelling Station	Futuk and Sons Ltd	Along Bus Stop Road, J/Yola	D & Build	2022	Ongoing
Shopping Mall	Interworld Technologies Ltd	Along Muhammad Mustapha Way, J/Yola	D & Build	2022	Completed
104 Bed Wards Storey Building (Sub-contract)	Bokkis Nig. Ent. Ltd	FMC Yola	Build	2021	Completed
Alhaji Yahaya Mai Sugar AYY Fuelling Station	Alhaji Yahaya Mai Sugar AYY Ltd	Along Yolde-Pate, Yola	D & Build	2021	Completed
250 Units Housing Estate	REDAN / Family Homes Fund	Ribadu, Fufore LGA	D & Build	2021	In Process
Extension of Perimeter Fence	Adamawa Homes and Saving Ltd	2 Bishop Street, J/Yola	D & Build	2020	Completed
Landscaping & Access Roads	Adamawa Homes and Saving Ltd	2 Bishop Street, J/Yola	D & Build	2020	Completed
Rehabilitation of Central Lab	Modibbo Adama University, Yola	MAU, Yola	D & Build	2020	Completed
100 Units Housing Estate	Modibbo Adama University, Yola	MAU, Yola	D & Build	2019	In Process
Water Supply and Sanitation	ADRWASSA	Fufore LGA, Adamawa State	Build	2015	Completed
Yola International Airport Mosque	Individual	Yola International Airport	D & Build	2014	Completed
Damilu Central Mosque	Damilu Community	Damilu, J/Yola	D & Build	2014	Completed

33KVA Mobile Transmitting Substation	PHCN (now YEDC)	Mayo Belwa	—	2013	Completed

7. ADDITIONAL DOCUMENTED EXPERIENCE

The supplied profile also identifies the following additional assignments and project concepts:

• Design and Construction of MAUTECH Senior Staff Housing Units

• Design and Construction of Mass Housing Unit under REDAN RUHI-774

These entries are retained as documented in the source profile; no additional client, date or status has been added where the supplied material does not provide it.

8. TECHNICAL CAPACITY & EQUIPMENT

ARCUD’s equipment schedule demonstrates capacity for road works, earthworks, compaction, asphalt placement, concrete production, material handling, lifting, water distribution and surveying.

1. Chip spreader

2. Vibratory steel drum compactor

3. Pneumatic tired roller

4. Motor grader

5. Paver

6. Cement mixer

7. Padfoot compactor

8. Crawler excavator

9. Forklift truck

10. Wheel loader

11. Truck crane

12. Lowbed trailer

13. Tipper truck

14. Water trucks

15. Surveying instruments (including levelling instrument, levelling staff and theodolite)

Equipment descriptions

The source profile describes the chip spreader as equipment for placing aggregate over bituminous binder; vibratory and pneumatic rollers for compaction; motor graders for road construction and maintenance; pavers for asphalt placement; cement mixers for concrete production; padfoot compactors for cohesive-soil compaction; crawler excavators for handling and excavation; forklifts and wheel loaders for material handling; truck cranes and lowbed trailers for lifting and transporting equipment; tipper and water trucks for site operations; and surveying instruments for field measurement.

9. QUALITY, SAFETY & PROJECT DELIVERY

ARCUD’s project profile demonstrates involvement in construction environments requiring coordinated site activities, plant and equipment, materials handling, civil works and building works. For future tenders and client submissions, the company should maintain documented procedures covering quality control, health and safety, environmental management, equipment inspection, project supervision, materials testing, site records and handover.

Where specific certifications, policies, personnel qualifications or statutory registrations are required, only current documents should be attached or referenced. This profile does not create or assume certifications that were not evidenced in the supplied source.

10. CLIENT & SECTOR EXPERIENCE

The documented project portfolio includes work associated with public-sector and infrastructure organisations, universities, financial institutions, property and housing organisations, private companies and individual clients. Examples appearing in the project schedule include FERMA, Modibbo Adama University, ECO Bank Plc, FCDA, Bokkis Nig. Ent. Ltd, Adamawa Homes and Saving Ltd, REDAN / Family Homes Fund and others.

11. CORPORATE CAPABILITY

ARCUD can present its capability to prospective clients through three complementary areas: documented project experience, access to relevant construction plant and equipment, and a multi-disciplinary service scope covering building and civil works. For procurement and tender purposes, the company should pair this profile with its current registration documents, tax and compliance documents, personnel CVs, equipment ownership/lease evidence, references and project completion certificates where available.

12. DOCUMENTS TO STRENGTHEN FUTURE TENDER SUBMISSIONS

The following supporting documents are recommended for the company's tender/contract file where applicable and available:

• Corporate registration and current statutory documents

• Tax clearance and other applicable compliance documents

• Current company address and official contact details

• Organisation chart and key personnel profiles/CVs

• Evidence of equipment ownership, lease or availability

• Project completion certificates and client reference letters

• Health, Safety & Environment policy

• Quality management procedures

• Bank reference / financial capacity documentation where required

• Insurance documents where required

• Relevant professional licences, registrations or certifications

• Photographic project portfolio with project names and dates

13. SELECTED PROJECT HIGHLIGHTS

Recent entries in the supplied profile include the construction of an NNPCL retail station in Yola as a subcontract in 2025; a shopping complex in J/Yola in 2023; road maintenance and repairs on the Dong–Sabon Gida road in 2022; a fuelling station and shopping mall in 2022; and housing, medical and university-related projects in earlier years.

The source profile also records projects extending back to 2013, including multiple ECO Bank ATM facility works, a 40,000-litre steel reservoir, a mobile transmitting substation and other building and infrastructure assignments.

14. CONCLUSION

ARCUD Multi-Services Limited’s supplied profile provides a documented record of construction and infrastructure activity across a range of project types and locations. This revised profile organises that evidence into a more concise corporate presentation suitable as a foundation for client introductions, prequalification submissions and tender documentation.
